It was a bit surprising when Dassault, a French company known for high standards of performance and technological advancement, announced that their next jet would be optimized for economy. Fortunately, they managed to create the Falcon 2000 without sacrificing their usual high standard of excellence. The Falcon 2000 is a private jet with a large cabin, transcontinental range, and fast cruise speeds. The Falcon 2000 is a solid private jet with high capabilities and great performance – a good option all around.
